

Jahnoel Rondon

Full Stack Software Engineer

Bethesda, MD | (857)-247-6320 | JahnoelRondon03@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Creative and visually inspired developer who is driven to bring ideas to life. I bring a curious and tenacious mindset when learning and taking on new challenges. My past experience as a retention specialist at a staffing agency for unemployed job seekers during covid helped me manage stressful situations and unrealistic expectations. I constantly find out of the box solutions that create interactive and seamless design centered applications that delight users and clients alike.

SKILLS

Programming Languages: JavaScript | HTML | CSS | Python | C#

Front-end: React | UX UI | Bootstrap | Responsiveness

Back-end: Node.js | Express

Database: MongoDB | Mongoose | PostgreSQL

Other Skills: Git | GitHub | Netlify | Heroku | Spanish - Native

PROJECTS

[Heart Blast \[Video\]](#): A Brick Breaker Built with C# and Unity Engine. A bold project that re-imagines the way we think about brick breaker games. Heavily coded using collision detection.

EXPERIENCE

Software Engineering Immersive | General Assembly | 09/2021 – 11/2021

Successfully completed 500+ hours of expert led instruction in backend and front end frame-works and hands-on learning of Full-Stack fundamentals in the industry's most in demand technologies. Developed projects in tight deadlines, including:

- [Marq \[GitHub\]](#) - Marq is an organizational/list-making application. It has many features to keep track of your time management as well as planning. The app was built with Django, Python, PostgreSQL, Javascript, Bootstrap, RoadGoat API.
- [Travutan \[GitHub\]](#) - Travutan is a city finder that lets you search for a city around the world and see its covid levels, population, and travel budget. The app was built with React, Javascript, Node.js, Express, Mongoose, MongoDB.
- [Gnome Home \[GitHub\]](#) - An encyclopedia with user reviews built with the MEN stack that uses Restful API conventions for CRUD operations.
- [Beast Slayers \[GitHub\]](#) - A Card Game Built with HTML, CSS, Javascript. Heavily coded using OOP with Javascript Class Constructors.

Worksource Montgomery | MD | Germantown | Retention Specialist - Feb 2020 / June 2021

- Made 120 calls a week and listened to customers' situation and interest for employment.
- Talked to customers and gained 12 monthly pay stubs for the State employment records.

EDUCATION: General Assembly | Software Engineer Immersive | Washington DC | 09/2021 – 11/2021
